

## Who are we?

Creative Pixels was established in Jeddah, Saudi Arabia on January 2009 by a group of professionals, talented and creative web designers & developers, with an ambition to revolutionize the way websites are built.

Our solutions are business and client driven, which sets us apart from the competition. We are aligned to deliver the best web solutions on the promise of personalized attention and expertise in problem resolution to our clients. Performing at a high level of achievement and contribution, we abide to industry standards, policies, and procedures.

This is however, just the beginning, and with each new contract Creative Pixels complete, we find and use new cutting edge techniques in order to deliver the perfect combination of form and function.

## Our Style

**Pioneering Websites:** Creative Pixels is a fresh web design company with fresh ideas. This has led to visually distinctive and memorable websites, and pioneering techniques to ensure our websites work for you.

**Driven by Results:** The very best website is useless if it does not achieve the right results. Creative Pixels will help you find the most useful and effective focus and purpose for your website to drive the results you need.

**Cost Effectiveness:** In a world where business is increasingly conducted over the web, it is important to have a professional and efficient website. By achieving the best results at a cost lower than many of our competitors we believe we offer the very best in cost effectiveness.

## What we do?

- **Web Design and Development:**

Normal websites, Flash websites and Content management systems.

- **Web Hosting:**

Linux based hosting plan with unlimited storage space and unlimited emails.

- **Multimedia Production:**

Multimedia presentations and Flash introductions.

- **Graphics Design:**

Company identity, Logo design, Brochures and Flayers.

- **Professional Photography:**

Indoor and outdoor professional photography.

- **Text Translation:**

Text translation service for English to Arabic and vice versa.

## Our Technologies

- **HTML / XHTML / CSS:** We have expertise in accessible, W3C standards compliant HTML/XHTML and CSS. We focus on liquid design to ensure compatibility with all browsers - be they on PC's, Mac, Linux or handheld devices.
- **JavaScript:** We always focus on accessible JavaScript for the best user experiences. We can build platform independent DHTML, as well as complex AJAX, Web 2.0 systems. All our sites cater for users who choose to disable JavaScript.
- **Flash:** Adobe Flash CS4 is our specialty. We have been heavily involved in the application and development of Flash since long time ago. Now onto Flash CS4 and Action Script, we are still at the forefront of Flash design and programming.

## Our Technologies

- **Photoshop:** We utilize the Adobe's infinitely powerful Photoshop CS4 and Illustrator CS4 for photo editing and vector graphic design.
- **PHP:** PHP is our server-side language of choice. Outstripping ASP for speed, reliability and compatibility PHP allows us to quickly and efficiently develop dynamic, content rich sites.
- **SQL:** Databases run the internet these days, and SQL is the best. Whether utilized for a simple client database or providing complete content for a dynamically driven, content rich site, SQL always meets the challenge.
